Simple Whatnots Club 16

Henry Glass Fabrics and Kim Diehl are pleased to offer two annual stitching programs available exclusively to quilt shops! Participation in the **2027 Simple Whatnots Club 16 and Hip to Be Square Stitch-Along Programs** is easy—simply purchase the complete line of Kim's **Scrap Basket Besties** prints **(available for order April 2026, with delivery of fabric December 2026)** and pattern handouts for both programs are yours. That's it!

Simple Whatnots Club 16 includes eight fun-to-stitch small quilts. Petite project sizes (typically 40" square or less) make these quilts approachable and quick to finish, and they're great skill builders! Pattern handouts feature clear, concise project directions, along with plenty of full-color illustrations. Consider including these handouts in kits, offer monthly club meetings for group sewing time, or use them in workshops to increase traffic into your shop—we simply ask that you don't sell them individually.

To tailor the club to fit your shop's individual needs, we encourage you to create your own guidelines when offering the **Simple Whatnots Club** to your customers. Consider releasing all club projects at once, choose to feature the projects individually at approximately six-week intervals throughout the year, or develop your own unique format!

As always, for added variety, Kim will choose one Simple Whatnots mini and makes it big. Please watch for this "bonus biggie" on the Henry Glass website approximately mid summer.

Because many quilters enjoy QAL's, we're offering **a second stitch-along program** for even broader customer appeal. Kim's full-size **Hip to Be Square Stitch-Along Quilt** combines time-honored Granny Square blocks along with a sprinkling of Sampler blocks for lots of variety and stitching fun. With the purchase of Kim's complete collection of **Scrap Basket Besties** prints, the complete sets of project directions for both programs are yours! Consider forming stitch-along clubs using the handouts for stitching sessions, include them in kits, or plan a series of workshops using the installments as a teaching guide. Again, we simply ask that the patterns aren't sold individually.

Yardage requirements for each program are pre-cut friendly and frequently include a variety of fat quarters, fat eighths, skinny eighths, chubby sixteenths, bitty bricks, and charm squares. For ordering purposes, **yardage estimates** for each program will be available on the Henry Glass website April 2026. ***Please use the published handouts provided in December when preparing kits, rather than the ordering estimates.***

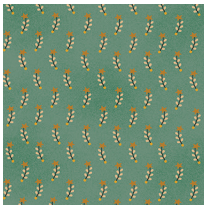

To simplify your participation in these stitching programs, as well as providing greater ease in restocking your inventory, Henry Glass is extending the length of time that the featured line will be available for purchase. Eventually all good things do come to an end, but the beauty of Kim's scrap-basket-style collections is that they're designed to be interchangeable and blend well with a variety of other prints. This means that as your on-hand inventory dwindles, it's easy to substitute other prints you have on hand.

Accessing the patterns is easy. Handouts for each program will be **available for download** on the Henry Glass website **December 2026** using a provided password—print and use them as often as needed!

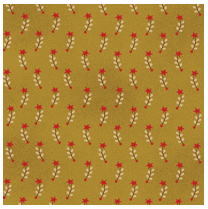

For additional information regarding the fabrics and programs described above, please contact your local Henry Glass sales representative or your favorite distributor.
